

How to find resources and help

When you're tackling unfamiliar tasks in your Business Sorter plan, it may help you to check out our resources, tips, and other helpful information we link or refer to. You can find the Business Sorter resources page by clicking on 'More' in the main menu.

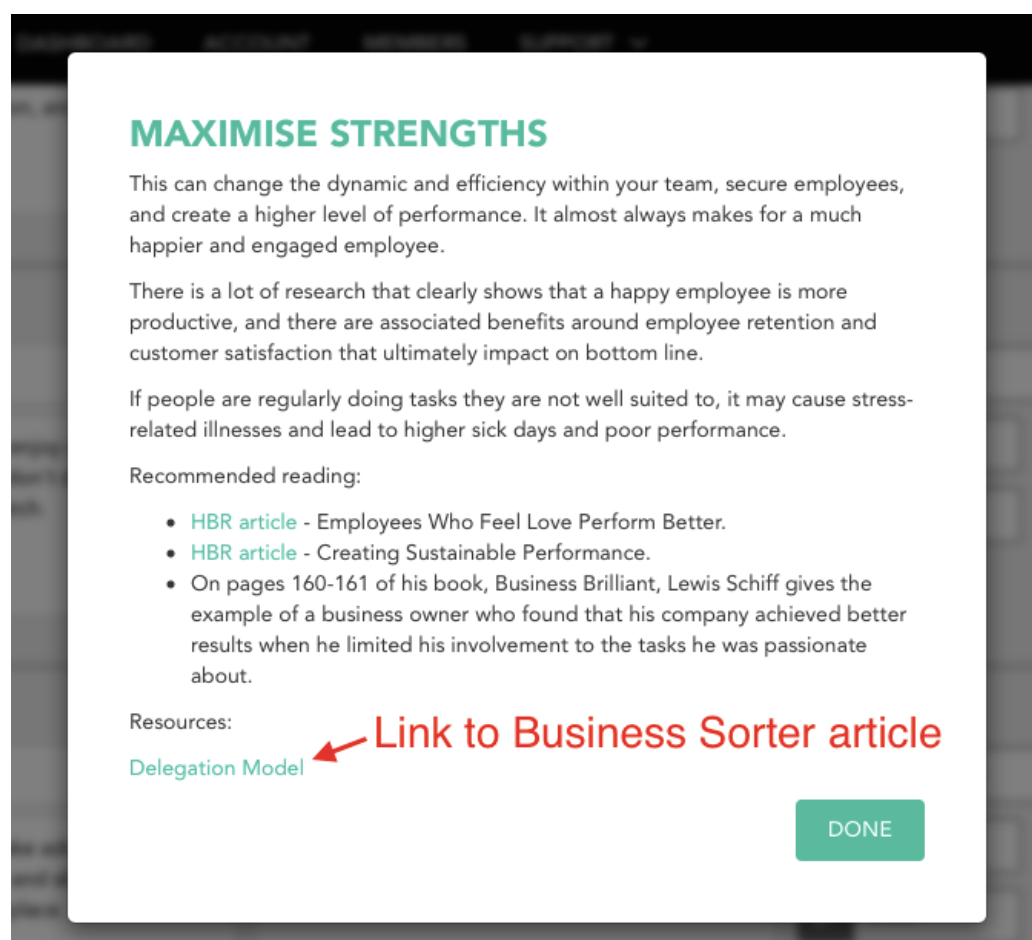

It has a range of articles and templates that can help you execute various aspects of your business plan.

At times, you will be pointed towards relevant articles and templates from the tips within your business plan.

For example, when you open the tip above, you will see (below) that it has a link at the bottom to 'Delegation Model'.

When you click the link, the resources page will open and the Delegation Model article will be highlighted in green.
